

New evolution for the "sport" version of the patented concept: S.I.T (Secure Individual Transport) system. Device without permanent fixation that secures autonomous children and passengers on powerful motorbikes, sporty driving and long trips: Optimised comfort of use and restraint of torso.

- 1 Better support : double chest support and adjustable belt with lumbar support.
- 2 More efficient : Double lateral support with quick lock. The adjustment of the support straps is independent: passenger and pilot.
- 3 Non-slip seat improved : bi-component Neoprene with special surface for the pilot.
- 4 More efficient : Double lateral support with quick lock. The adjustment of the support straps is independent: passenger and pilot.

Code : SB0102

Waist : Adjustable up to XXL

Color: Grey / Black

Code : SBAG0102 (Version with backpack)

Waist : Adjustable up to XXL

Color: Grey / Black

- 1 2 Harness with lumbar support and multiple adjustments. Adjustable straps, waist strap and removable, ergonomic and pivoting belt. Back support and straps made in comfortable foam and mesh. High resistant fabric.
- 3 Back pocket for storage.
- 4 High quality seat made in bi-component Neoprene with special surface for the pilot. X system for straps for high resistance and optimal support.
- 5 Double adjustment system of support straps. The passenger and the pilot can increase or decrease separately the support strength.

- 6 Removable backpack with zip. One big pocket and a small front pocket. High resistant fabric.
- 7 Quick set up on the harness. Integral zip.
